Exercice 3:

1b -
```
int inserer(int T[], int n, int valeur, int position){
  if(!((position>=0 && position<=n) && n<100))
      return n;

  if(position==n){T[position]=valeur; return n+1;}

  for(int i=n-1; i>=position; i--){
      T[i+1]=T[i];
  }
  T[position]=value;
  return n+1;
}
```

2)
```
int supprimer (int T[], int n, int position){
if( position<0 || position>=n) return n;

for(int i = position+1; i<n; i++){
        T[i-1] = T[i];
}
T[n-1] = 0;
return n-1;
}
```

3)
```
int main(){
  int t[100]={1,2,3,4,5,6}; int n=6
n=inserer(t,n,99,2);
n=supprimer(t,n,1);
n= inserer(t,n,99,n);
n= supprimer(t,n,5,101);
return 0;
}
```
